

SUHAS PHUNDE

New Jersey, USA | +1 (973) 978-2278 | suhasp11@live.com | linkedin.com/in/suhas-devops

PROFESSIONAL SUMMARY

Senior DevSecOps Engineer & Cloud Architect with 17+ years delivering enterprise infrastructure transformations for Fortune 500 clients across Financial Services, Telecommunications, Healthcare, and Energy sectors. Architected 300+ AWS resources across 8 HIPAA/PIPEDA-compliant environments with first-attempt Terraform apply. Led zero-downtime migration of 50+ microservices from Azure to Kubernetes. Authored 50+ Terraform modules and 2,500+ line CI/CD orchestrator pipelines. Recognized with T-Mobile Client KUDOS and IBM Excellence Award for platform reliability, security posture, and developer velocity. Speaker at AWS Summit and IBM Think conferences on Agentic AI infrastructure.

CORE COMPETENCIES

Cloud Architecture (AWS/Azure/GCP)

Kubernetes & EKS

Terraform IaC at Scale

CI/CD Pipeline Engineering

DevSecOps & Shift-Left Security

Agentic AI Infrastructure

HIPAA/PIPEDA Compliance

Zero-Downtime Migrations

Container Orchestration

Infrastructure Automation

Site Reliability Engineering

Enterprise Middleware

TECHNICAL SKILLS

IaaS	AWS (EC2, S3, VPC, EBS, EFS, Route 53, KMS, DynamoDB, Lambda, CloudFront, WAF, GuardDuty), Azure (VNETs, VMs, AKS), GCP, Terraform (50+ modules), CloudFormation, Ansible, Chef
PaaS & Containers	Kubernetes, Amazon EKS, Azure AKS, Red Hat OpenShift, Karpenter, Istio, Docker, Helm Charts, WebSphere (WAS), WebLogic, JBoss, Apache Tomcat
SaaS & AI/ML	Retrieval-Augmented Generation (RAG), Vector Databases (pgvector, Pinecone, Neo4j), IBM Consulting Advantage (ICA), IBM Bob, LangGraph, LangChain, CrewAI, MCP, AWS Bedrock, GitHub Enterprise, GitLab, ServiceNow, JIRA
CI/CD & Build	GitHub Actions, GitLab CI/CD, Jenkins, Bamboo, TeamCity, UrbanCode Deploy, Maven, Ant, Gradle
Security & Quality	Snyk, Trivy, Checkov, tfsec, SAST/DAST, SonarQube, CyberArk, HashiCorp Vault, GaraSign, Cosign, Selenium, Karate, JUnit
Monitoring & Ops	Splunk, Prometheus, Grafana, AppDynamics, ELK Stack, AWS CloudWatch, Security Hub
Languages	Python, Bash/Shell, Java, Groovy, PowerShell, YAML, JSON, SQL
Databases	Aurora PostgreSQL, MySQL, Oracle, DB2, Snowflake, DynamoDB, pgvector, Pinecone, Neo4j

CERTIFICATIONS

HashiCorp Certified: Terraform Associate (002) — 2021	CKAD: Certified Kubernetes Application Developer — 2021
Microsoft Certified: Azure Fundamentals — 2021	AWS Certified DevOps Engineer – Professional — 2020
AWS Certified SysOps Administrator – Associate — 2020	AWS Certified Solutions Architect – Associate — 2018
IBM Certified Solution Advisor – DevOps V1 — 2018	IBM Certified Deployment Prof. – UrbanCode Deploy — 2018
Enterprise Design Thinking Practitioner — 2018	Python for Data Science — 2018

RECOGNITIONS & SPEAKING ENGAGEMENTS

Speaker, AWS Summit (2026): "Architecting HIPAA-Compliant Agentic AI on EKS"	Speaker, IBM Think (2025): "Empowering CI/CD with Agentic AI at Enterprise Scale"
Open-Source Contributor: Custom MCP integrations for DevSecOps pipelines	IBM Excellence Award (2024): T-Mobile DPTC Azure-to-K8s migration
T-Mobile Client KUDOS (2025): Security posture & release velocity	SunGard KODOS Award (2013): On-time delivery excellence

PROFESSIONAL EXPERIENCE

Application Consultant - DevOps Engineer

Apr 2026 – Present

IBM Corporation (Client: GNQ Insilico Inc.) — New Jersey, United States

Architected complete AWS cloud infrastructure and Agentic AI platform for BioAvatar Digital Twins — HIPAA/PIPEDA-compliant healthcare platform spanning 8 environments, 2 AWS regions, 7 accounts, 5 OUs.

- **AWS Architecture:** Designed multi-account Landing Zone with 5 OUs across 7 accounts enforcing HIPAA (us-east-1) and PIPEDA (ca-central-1) compliance with zero cross-region data leakage; delivered 300+ resources per environment (VPC, EKS, Aurora, KMS, IAM, S3, DynamoDB, Route 53, CloudFront, WAF) via Terraform
- **Terraform IaC:** Authored 50+ modules provisioning EKS, Aurora PostgreSQL (Serverless v2 dev/qa, Provisioned db.r6g.large prod), KMS, IAM (OIDC), Helm releases; engineered 4 stale-plan detection guards achieving first-attempt apply success; implemented lifecycle protection on all stateful resources
- **EKS/Kubernetes:** Deployed EKS v1.34 with private-only API endpoints, AL2023 nodes, Karpenter v1.1.1+ autoscaler; configured VPC CNI, CoreDNS, EBS/EFS CSI Drivers, ALB Controller via IRSA; implemented ESO with ClusterSecretStore backed by AWS SSM; enforced default deny-all Network Policies
- **Agentic AI Platform:** Designed 3-microservice AI platform on EKS with LangGraph stateful 5-node state machine; leveraged IBM Consulting Advantage (ICA) and IBM Bob AI agentic platform to accelerate Python/Java microservice coding, unit testing (JUnit), and pipeline deployment; built custom MCP server and integrated LangChain/CrewAI RAG with AWS Bedrock
- **GitHub Actions CI/CD:** Designed 2,500+ line advanced-master-orchestrator with 10 pipeline stages, GitHub OIDC (zero static credentials); built ARC self-hosted runners on EKS; engineered 9-agent pre-push automation; implemented EKS Protection Guard scanning plan JSON
- **Security & DR:** Enforced zero cross-border access via IAM condition keys, SCPs, separate KMS keys; deployed WAF with OWASP Top 10 rules; designed Active-Passive DR with Route 53 failover and Aurora Global Database (RPO near-zero, RTO 15 min)

Application Consultant – DevOps Engineer

Nov 2025 – Apr 2026

IBM Corporation (Client: Options Clearing Corp) — New Jersey, United States

- Led enterprise Vault-to-Vault migration with automation-driven approach, reducing incident risk from missing/outdated secrets by 95%
- Automated end-to-end migration via shell scripts using Vault HTTP APIs with retries and parallelism
- Supported Snyk implementation across Jenkins and TeamCity build jobs, integrating security gates into Maven and Ant build processes to proactively identify dependency and container vulnerabilities

Lead DevOps Engineer

Jan 2022 – Nov 2025

IBM Corporation (Client: T-Mobile US) — New Jersey, United States

★ KUDOS RECEIVED: T-Mobile Client Appreciation for Outstanding Engineering Contributions (Nov 2025)

Led DevSecOps for T-Mobile DPTC platform — 50+ microservices across Azure Cloud and on-prem Kubernetes, integrated with Kafka, Snowflake, and Apigee.

- **CI/CD:** Built reusable GitLab CI/CD templates with YAML anchors/includes across Dev, QA, UAT, Prod; implemented multi-stage pipelines with downstream triggers, approval gates, SAST/DAST scans, caching, and parallel jobs; migrated GHES workflows to GitLab
- **Migration:** Delivered end-to-end Azure-to-K8s migration of 50+ microservices with zero downtime using Helm charts, rolling updates, and blue-green deployments
- **Security:** Implemented GaraSign key-pair auth for Snowflake, Azure Vault integration; built vulnerability detection gates; integrated CyberArk SAFE and HashiCorp Vault for secret management; enforced TMO/main prod-deploy controls
- **Automation:** Integrated Karate and Selenium regression testing frameworks into GitLab pipelines; built Splunk dashboards with automated alerts; configured AppDynamics for transaction monitoring; automated Vault, K8s cluster ops, and Helm charts via Python and Shell scripting
- **Data:** Automated MySQL and Snowflake schema/user provisioning via GitLab; designed optimized SQL queries for data extraction

Application Consultant – DevOps Engineer

Oct 2020 – Oct 2021

IBM Global Services (Client: Barclays) — Pune, India

- Designed Jenkins pipelines with Maven and multi-branch support; containerized Java applications on Red Hat OpenShift with BuildConfigs, DeploymentConfigs, and automated rollouts
- Provisioned AWS infrastructure (VPC, EC2, RDS, S3, IAM, EKS) using modular Terraform with S3 backend and DynamoDB locking; integrated SonarQube and JFrog Artifactory

Application Consultant – DevOps Engineer

Jul 2020 – Oct 2020

IBM Global Services (Client: Bendigo and Adelaide Bank) — Pune, India

- Led monolith-to-microservices migration with GitLab AutoDevOps and Kubernetes; built CI/CD for AngularJS/Spring Boot apps deploying to K8s
- Created PySpark pipelines for AWS EMR; automated AWS provisioning via Terraform; implemented Istio service mesh for zero-downtime rollouts

Application Consultant – DevOps Engineer (Team Lead)

Mar 2018 – Jun 2020

IBM Global Services (Client: Xcel Energy – US) — Pune, India

- Led DevOps strategy for AMI and ADMS energy programs delivering ~5 releases/year; designed end-to-end pipelines using RTC, Jenkins, UrbanCode Deploy for ESB/IIB Middleware
- Automated IIB EAR deployments on WebSphere via Shell/Python; reduced deployment times from hours to minutes; implemented Splunk and ELK monitoring

Senior Internet Engineer – DevOpsJul 2015 – Apr 2017

Mastercard Technology Pvt Ltd — Pune, India

- Created Chef cookbooks for automated deployments at scale; led production incident resolution across F5, JBoss, and WebSphere; migrated physical servers to cloud
- Maintained enterprise DevOps platform (Jenkins, Bamboo, Nexus, GitHub, SonarQube, Docker, Chef, Ansible); automated multi-tier deployments via Ansible playbooks

Associate Consultant – Java DeveloperApr 2014 – May 2015

Principal Global Services Pvt. Ltd — Pune, India

- Managed Jenkins pipelines and Git workflows for CI/CD; developed Java EE applications; packaged EAR/WAR artifacts with Maven deploying to WebSphere

Senior Build and Release EngineerOct 2009 – Mar 2014

SunGard Global Solutions (FIS) — Pune, India

- Engineered CI/CD using Bamboo, reducing release cycles by 40%; administered WebSphere, JBoss, Tomcat, WebLogic, and IIS across all environments
- Automated Java EE and .NET build/deployment using Ant, Maven, and custom VisualCron jobs; managed SVN/Git branching strategies

Technical Support OfficerJan 2009 – Apr 2009

Convergys India Services (Client: Microsoft) — Pune, India

- Member of first IE8 support team launched by Microsoft with Convergys; received KUDOS for CSAT performance

EDUCATION

Bachelor of Computer Engineering — Data Structures & Algorithms2004 – 2008

Savitribai Phule Pune University, India

Diploma in Computer Engineering2001 – 2004

Cusrow Wadia College of Engineering, Pune, India

KEY ACHIEVEMENTS

Achievement	Impact
BioAvatar Digital Twins Platform (2026) – GNQ Insilico Inc.	300+ AWS resources across 8 HIPAA/PIPEDA environments with first-attempt Terraform apply
T-Mobile Client KUDOS (2025)	Recognized for improving platform reliability, security posture, and developer velocity
Azure to K8s Migration (T-Mobile)	50+ microservices migrated with zero downtime using Helm, rolling updates & blue-green
Vault Migration (OCC)	Automated secret path migration, 95% incident risk reduction
AMI/ADMS DevOps (Xcel Energy)	~5 releases/year for mission-critical energy infrastructure
Financial Platform CI/CD (FIS)	Release cycles reduced 40% via Bamboo automation
